

Thermal arm of Hindustan Power receives the prestigious Safety and Health services award from National Safety Council

May 9, 2014

Recognized for its efforts to implement zero incident EHS Management Systems at Anuppur Thermal power project.

Hon'ble Minister of labour and employment, Government of India will present the prestigious award.

Anuppur, 06, May 2014: The thermal arm of Hindustan Power (Hindustan Power) has been accorded the prestigious National Safety Council award towards implementing a very effective occupational safety & health practices in its Anuppur Thermal plant. The Anuppur project has been bestowed with the award second-time in a row, showcasing its continuous efforts in maintaining effective EHS Management System and processes. NSCI award is given by Ministry of Labour, Govt. of India to organizations for maintaining consistent and meritorious Occupational Safety & Health performance. The Company will receive the award jointly with its EPC contractors of the project.

Speaking on the award, Ratul Puri, Chairman, Hindustan Power, said, "The safety award for second consecutive year is a testimony of our stringent non-negotiable EHS practices. We believe that only by maintaining highest standards of safety, working on the principle of zero incident, we can truly achieve the sustainable results. The construction power projects are very long drawn and specialized, hence it is necessary to introduce best-in-class safety practices in every area of the construction and commissioning."

He added, this is the only project in the country that has been bestowed with single window approval for safety. Our highly sophisticated plant construction and erection process through deployment of state of the art mechanized equipment, providing training to the workmen and the policy of conducting medical examination including vertigo test before recruiting workmen has allowed incident free work at the site.
